THE RIAK GUYS

A screenshot of a presentation slide. The slide has a light blue background with a dark blue header containing the Riak logo. On the left side, there is a vertical stack of three images: the top one shows the words "CODE BEAM" in a stylized, geometric font; the middle one shows a cartoon character of a man in a suit and sunglasses holding a briefcase; the bottom one shows a man in a light blue shirt speaking at a podium. The main content of the slide is the title "Riak's Rebirth" in a large, dark font, followed by the name "Nicholas Adams" and his title "Director, TI Tokyo" in a smaller font. At the bottom of the slide, there is a dark blue bar with the text "Riak's Rebirth" and "Nicholas Adams" in white.

The screenshot shows the Riak website homepage. At the top is a dark blue navigation bar with the Riak logo and the text "/home". To the right of the logo are search and navigation links: "DOCS", "GUIDES", "PROJECTS", "DOWNLOADS", "DISCUSS", and a "LOG IN" button. Below the navigation bar is a large white section titled "WELCOME TO THE RIAK COMMUNITY". This section features an illustration of a person in a uniform holding a tablet, surrounded by icons representing a globe, a shopping cart, and a server rack. The text in this section reads: "Riak helps enterprises build more resilient applications for when accurate, reliable data matters. Riak's distributed system provides incredibly high availability, perfect data consistency and superb low-cost horizontal scaling." Below this is a list of features: "Riak® is a distributed NoSQL database that delivers:" followed by a bulleted list: "• Unmatched Resiliency beyond typical 'high availability' offerings", "• Innovative technology to ensure data accuracy and never lose a write", "• Massive scale on commodity hardware", and "• Common code foundation with true multi-model support." A prominent orange "GET STARTED" button is located at the bottom of this section. Below the welcome section is a "Our Projects" section with three columns. The first column is for "riakKV", described as a distributed NoSQL key-value database with advanced local and multi-cluster replication. The second column is for "riakCS", described as easy-to-use object storage software built on top of Riak KV. The third column is for "riakTS", described as the only enterprise-grade NoSQL time series database optimized for IoT and Time Series data.

NEW RELEASES

The screenshot shows a web browser window with the address bar containing `https://files.tiot.jp/riak/kv/2.9/2.9.0/`. The page header features the TITOKYO logo and navigation links for "FTP Root", "Website", and "Contact Us". The main content area displays a directory listing for the path `root > riak > kv > 2.9 > 2.9.0`. The listing includes a table with columns for "Name", "Last modified", and "Size".
